

Poster Preparation Checklist

Thank you for participating in the SESUG 2007 Poster Café!

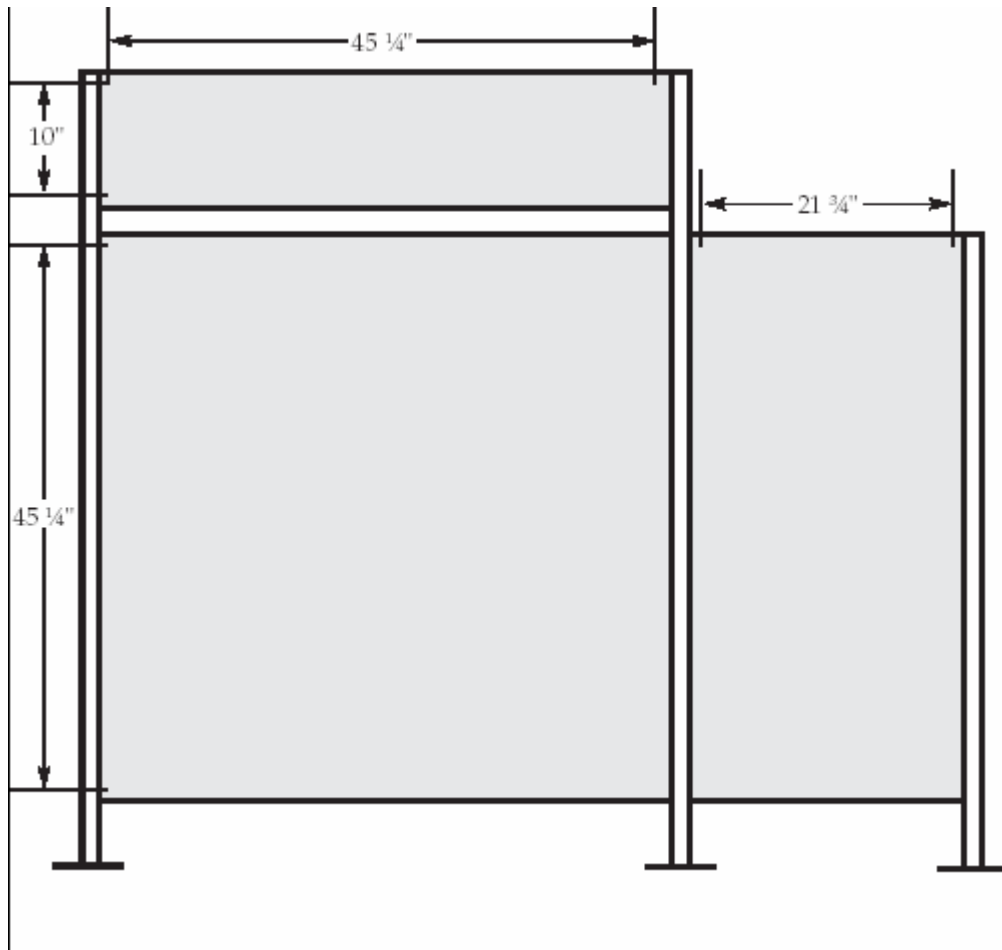

You are responsible for setting up, taking down, and presenting your poster according to the instructions in this checklist and additional instructions from the Poster Section Chairs.

Poster Guidelines

- The main panel is 4 feet square (usable space is 45¼ inches square) and the adjacent side panel is 2 × 4 feet (usable space 21¾ × 45¼ inches).
- The presentation poster boards are covered with a blue material. Velcro dots will be available for attaching your poster to the board.
- The 4-foot square main panel is separated from the 2 × 4 foot side panel by a metal bar. If your presentation is very compact, you can leave the side panel empty. Alternatively, you can use the main panel to present both the problem and the solution, and use the side panel to summarize and discuss your technique.
- The title and names of the authors of the poster will be typeset in large letters to fit in the 1 × 4 foot top panel and will be available for your use at the conference.
- Since conference attendees will have a CD with your proceedings paper, handouts are likely not required.
- A poster is like an outline, not a novel. Keep the information on the poster simple and easy to follow. Remember that you will be there to explain it. Details can be included in the paper that you prepare for the Proceedings.
- It is recommended that you use ¼-inch text (easily visible from 5 feet) on your poster. Important statements and headings should be larger.
- Use mat board or construction paper to form visual divisions among sections of text.
- Graphs, pie charts, box charts, drawings, and other artwork are effective poster enhancements.

An excellent resource for poster presenters, **Effective Poster Presentations for SAS® User Group Conferences: Recommendations and Techniques** by Helen-Jean Talbott, contains practical suggestions for poster design, materials, color, lettering, graphics, and construction methods. This document is available at http://support.sas.com/usergroups/sugi/talbott_poster_paper.pdf.
